

Kno2 Celebrates National Health IT Week September 26-30, 2016

Organization drives improved patient care delivery through interoperable patient document exchange

BOISE, Idaho—Sept. 26, 2016—[Kno2](#), the company that optimizes patient document exchange for everyone in healthcare, is joining forces with other leading HIT vendors and organizations to celebrate National Health Information Technology (NHIT) Week, September 26-30, 2016.

This year's NHIT Week theme, One Voice, One Vision: Transforming Health and Care, closely mirrors Kno2's mission to connect providers everywhere, delivering critical patient information and streamlining clinical workflows and enhancing patient care quality.

Kno2's cloud-based patient document exchange platform provides workflow efficiencies and cost-savings to all healthcare organizations, regardless of whether they're using fax, Direct message or fully electronic document exchange. This scalable, HIPAA-compliant data exchange solution—with a clear roadmap to comprehensive interoperability—is beneficial to all health systems and hospitals, particularly those in rural-based areas that have traditionally had limited access to electronic medical records (EMRs)—all looking to connect to their entire communities.

"It is the responsibility of the Health IT industry to seek solutions that will extend interoperability to the last mile of care," said Jon Elwell, CEO of Kno2. "Our participation in National Health IT Week underscores our commitment to ensuring that health information technology is integrated, interoperable and accessible to all care providers along the technology maturation spectrum, with the goal of optimizing patient outcomes."

To learn more about the transformation of healthcare through interoperable patient document exchange, read Kno2's recent blog post on [Cloud Fax: The First Step towards Health IT interoperability](#). For additional information about National Health IT Week, visit www.healthitweek.org.

About Kno2

Kno2™ optimizes patient document exchange for everyone in healthcare. The company's cloud-based platform improves the healthcare experience for providers and their patients by making sharing documents easy, affordable and secure. Even healthcare providers with limited resources can participate in the simple, structured exchange of patient documents—without changing their workflow or technology infrastructure. The Kno2 platform captures and exchanges documents from virtually any source ranging from a fax machine to an EMR. The innovative platform is smart enough to determine the most interoperable format and method of exchange for a document. All of this functionality is available through a simple set of APIs or through Kno2's provider portal. Learn more about how Kno2 adds value to patient document exchange at www.kno2.com.

About National Health Information Technology Week

Now in its eleventh year, National Health IT Week is a collaborative forum assembling key healthcare constituents—vendors, provider organizations, payers, pharmaceutical/biotech companies, government agencies, industry/professional associations, research foundations, and consumer protection groups— working together to elevate national attention to the necessity of advancing health IT. Log onto <http://www.healthitweek.org> for more information.
