

Leading the *future* of  
healthcare communication™

## CONNECTIVITY OVERVIEW

# Plug 'N Play EHR Integration

Many EHRs have implemented both FHIR® and native APIs, allowing external systems to connect and drive efficiency and automation with the EHR. Kno2 allows you to easily connect and facilitate seamless exchange and communication between your EHR, internal office applications and the external provider community.

Our workflow-first approach has enabled Kno2 to define a plug and play implementation, allowing us to complete an EHR integration for exchange workflows in hours and days, not weeks and months. Kno2's commitment to connectivity means we are ever expanding our list of EHR API integrations, breaking down barriers to communication and adoption by the provider community by effective integrations with EHRs everywhere!

### Broad EHR Platform Support

Whether an EHR integrates to our Kno2 Communication API, we integrate to their APIs, or we use standards-based connection options including FHIR and Direct Secure Messaging with no integration - seamless communication is achieved across the healthcare ecosystem.

## Key Features

### Point-and-Click Connection

Once Kno2 has completed integration with an EHRs APIs, the connection and setup is all point-and-click and does not require technical resources, time or expense. Just select the EHR within your Kno2fy account, provide security and authentication details and you are connected.

### Always Up-to-Date Information in EHR

Clinical information received is quickly assigned back to the patient and in the correct area of their patient record, including to the correct visit, order and other areas along with a provider task for review, if necessary.

### Connect Your Office Applications and Solutions to Your EHR

Drive efficiency and streamline workflows in your office and quickly connect internal solutions such as DocuSign, Xerox or Konica Minolta devices and others to your EHR.

### Automate Indexing

Identify, classify and map patient and document type information to automatically populate the correct areas of a patient's chart - dramatically reducing the manual steps required to tag and file records, whether structured and unstructured.

### EHR Connection via API

Connect quickly to the Kno2 ecosystem of integrated EHRs by leveraging our Capabilities API endpoint. Be integrated to any Kno2 Connected™ EHR within a very short period of time and avoid the heavy lift of individual integrations.

## Accessing Kno2

EHR integrations are quickly accessible through Kno2's Communication API or through our online web portal called Kno2fy™. Gain streamlined access to all of healthcare's major networks and interoperability frameworks, through one easy connection. To view all our connected networks and interoperability frameworks, visit: [kno2.com/connectivity](https://kno2.com/connectivity).

### Kno2 Communication API

Kno2 has a robust healthcare communication API that enable you to integrate quickly and securely for sending, receiving, and finding patient information directly into your product. With a single connection to the Kno2 network, you can rapidly turbocharge your product with the ability to communicate across the healthcare ecosystem.

Kno2's Communication API is based upon the core principles of SEND, RECEIVE and FIND for sharing all patient information, structured or unstructured, across any network made available through Kno2. Quickly implement our API and begin sharing patient information across the healthcare ecosystem.

#### Conversations

With Kno2 Conversations, maximize communication by enabling and enhancing bi-directional, closed-loop exchange of patient information between two or more parties across all forms of connectivity.

#### Directory

Access and search national provider and organization directories through Kno2.

#### Capabilities

Connect once for immediate integration and communication with any Kno2 Connected EHR.

### Kno2fy Communication Portal

Register and within 24 hours, gain access to the Kno2 network and the entire healthcare ecosystem through our online communications portal, Kno2fy, built upon our Communication API. Quickly transition disparate workflows, such as stand-alone fax machines and third-party portals, into centralized and streamlined communications customized to your organization, improving staff efficiency and patient care.

#### Centralized Connectivity

Connect to one or more networks through Kno2fy and be able to SEND, RECEIVE and FIND patient information, structured or unstructured, across the healthcare ecosystem all through one experience.

#### Conversations

Maximize communications with external parties by utilizing Kno2 Conversations that close the loop on healthcare's most common bi-directional workflows.

#### Directory

Locate addresses and endpoints for provider and organizations across the nation through Kno2fy's online directories.

#### Document Viewing & Handling

Kno2fy provides basic and advanced document QC and viewing tools, for efficiently handling structured and unstructured patient information.
