

Leading the *future* of healthcare communication™

CONNECTIVITY OVERVIEW

Nationwide HIE Access

Health Information Exchanges (HIEs) provide valuable infrastructure for sharing health data for patient care, population health, and social determinants of health. Commonly, each HIE maintains their own infrastructure and likely has differing technical and policy requirements for participation that creates a real challenge for technology vendors and healthcare providers who need to participate in one or more HIEs. As a result, many HIEs lack access to the complete population of providers and patients and thus have incomplete information.

We completely remove this complexity. Through a partnership with Kno2, the submission, retrieval and receipt of important clinical information with an HIE is made simple and affordable to all – finally closing the information and care gaps in geographies across the country.

A growing network of Kno2 Connected™ HIEs

By connecting once through Kno2, providers and technology vendors gain access to a broad and growing set of HIEs around the nation. Kno2 is connected to 20+ HIEs, including:

Key Features

Connect Once, Access All

By connecting once to Kno2, you are enabled for submission, retrieval and receipt of HIE-driven event notifications for any Kno2 Connected™ HIE. You no longer have to build and maintain a unique connection to each HIE...Kno2 does that for you.

Easy Submission

Kno2 enables easy submission of patient demographic data, admission, discharge and transfer (ADT) event data and patient data/ documents to any Kno2 Connected HIE.

On Demand Retrieval

Kno2 enables easy retrieval of patient records on demand, such as C-CDA's, available within each Kno2 Connected HIE.

Event Notification

Get critical patient event notifications and clinical data, such as a notice of admission for subscribed patients from Kno2 Connected HIEs.

Connection Commitment

Kno2 is committed to connecting to HIEs across the nation for submission, retrieval and event notifications on behalf of our partners and end users. While we are completing out this connection effort, specific HIE connection requests from our partners and end users are prioritized and will be brought to the top of the queue.

Accessing Kno2

Nationwide HIE connectivity is quickly accessible through Kno2's robust Communication API or regionally through our online web portal called Kno2fy™. Gain streamlined access to all of healthcare's major networks and interoperability frameworks, including state and regional HIEs, through one easy connection. To view all the communication capabilities of the Kno2 network visit: kno2.com/connectivity.

Kno2 Communication API

Kno2 has a robust healthcare communication API that enable you to integrate quickly and securely for sending, receiving, and finding patient information directly into your product. With a single connection to the Kno2 network, you can rapidly turbocharge your product with the ability to communicate across the healthcare ecosystem.

Kno2's Communication API is based upon the core principles of SEND, RECEIVE and FIND for sharing all patient information, structured or unstructured, across any network made available through Kno2. Quickly implement our API and begin sharing patient information across the healthcare ecosystem.

Conversations

With Kno2 Conversations, maximize communication by enabling and enhancing bi-directional, closed-loop exchange of patient information between two or more parties across all forms of connectivity.

Directory

Access and search national provider and organization directories through Kno2.

Capabilities

Connect once for immediate integration and communication with any Kno2 Connected EHR.

Kno2fy Communication Portal

Register and within 24 hours, gain access to the Kno2 network and the entire healthcare ecosystem through our online communications portal, Kno2fy, built upon our Communication API. Quickly transition disparate workflows, such as stand-alone fax machines and third-party portals, into centralized and streamlined communications customized to your organization, improving staff efficiency and patient care.

Centralized Connectivity

Connect to one or more networks through Kno2fy and be able to SEND, RECEIVE and FIND patient information, structured or unstructured, across the healthcare ecosystem all through one experience.

Conversations

Maximize communications with external parties by utilizing Kno2 Conversations that close the loop on healthcare's most common bi-directional workflows.

Directory

Locate addresses and endpoints for provider and organizations across the nation through Kno2fy's online directories.

Document Viewing & Handling

Kno2fy provides basic and advanced document QC and viewing tools, for efficiently handling structured and unstructured patient information.
