Kno2®

CONNECTIVITY OVERVIEW

Ubiqitious E-Signing Workflows

Provider to provider, provider to patient and third party to provider signing workflows remain some of the most burdensome processes in healthcare managed by paper, broken fax workflows or single purpose, proprietary signing portals.

We have integrated eSigning technology directly into clinical workflows, removing the burden for administrative staff, clinicians and patients. Kno2 enables e-signing to occur between two or more parties, even if they are using different systems, without any added work.

> *Using Kno2 Connected technologies, the burdens of eSigning are a thing of the past.*

eSigning Support

As the most connected network in healthcare, Kno2 can deliver documents for signature to any Kno2 Connected™ platform or EHR by simply using Kno2's SEND and RECEIVE options. Finally, broken signing workflows are a thing of the past.

Key Features

Connect Once, Send Anywhere

Send documents for signature to the most common signing solutions, including DocuSign™, EHRs that support e-signing, closed loop fax options, and others.

Broad Signer Preference Support

Kno2 is not required on both sides for you to improve your eSigning processes. We deliver the documents for signature based upon the preference of the signer, removing broken workflows and encouraging adoption.

Automatically File Signed Documents

Enable automated filing of signed documents back into the patient record, removing the expense and human resource required in many signing workflows today.

Closed Loop Fax Signing

Kno2's Track the Fax option streamlines fax signing workflows through automated barcode creation, reconciliation and filing, allowing providers to feel the same value as eSigning.

Connection Commitment

Kno2 is committed to expanding the connectivity to healthcare's most preferred eSigning technologies, making them available to providers within easy-to-manage workflows.

Accessing Kno2

Ubiquitous e-signing is quickly accessible through Kno2's robust Communication API or through our online web portal called Kno2fy™. Gain streamlined access to all of healthcare's major networks and interoperability frameworks, through one easy connection. To view all the communication capabilities of the Kno2 network, visit: **kno2.com/connectivity**.

Kno2 Communication API

Kno2 has a robust healthcare communication API that enable you to integrate quickly and securely for sending, receiving, and finding patient information directly into your product. With a single connection to the Kno2 network, you can rapidly turbocharge your product with the ability to communicate across the healthcare ecosystem.

Kno2's Communication API is based upon the core principles of SEND, RECEIVE and FIND for sharing all patient information, structured or unstructured, across any network made available through Kno2. Quickly implement our API and begin sharing patient information across the healthcare ecosystem.

Conversations
With Kno2 Conversations, maximize communication by enabling and enhancing bi-directional, closed-loop exchange of patient information between two or more parties across all forms of connectivity.

Directory
Access and search national provider and organization directories through Kno2.

Capabilities
Connect once for immediate integration and communication with any Kno2 Connected EHR.

For further details on our Communication API, please visit: **kno2.com/api**

Kno2fy Communication Portal

Register and within 24 hours, gain access to the Kno2 network and the entire healthcare ecosystem through our online communications portal, Kno2fy, built upon our Communication API. Quickly transition disparate workflows, such as stand-alone fax machines and third-party portals, into centralized and streamlined communications customized to your organization, improving staff efficiency and patient care.

Centralized Connectivity
Connect to one or more networks through Kno2fy and be able to SEND, RECEIVE and FIND patient information, structured or unstructured, across the healthcare ecosystem all through one experience.

Conversations
Maximize communications with external parties by utilizing Kno2 Conversations that close the loop on healthcare's most common bi-directional workflows.

Directory
Locate addresses and endpoints for provider and organizations across the nation through Kno2fy's online directories.

Document Viewing & Handling
Kno2fy provides basic and advanced document QC and viewing tools, for efficiently handling structured and unstructured patient information.

For further details on Kno2fy, please visit: **kno2.com/kno2fy**
