Kno2®

Connecting Signature Workflows Across Healthcare

Kno2 DocuSign® EHR Connector

Industry-leading eSigning workflows are now enabled to interact directly with nearly every EHR across U.S. healthcare with the Kno2 DocuSign EHR Connector.

With the Kno2 Connector, healthcare providers can now drive efficiency and ensure integrity throughout the eSigning process.

Connectivity with simplicity

Automate the creation, distribution, signing and delivery of completed documents back to the patient chart in the EHR, like admission packets, new patient onboarding forms, consents and others.

Connectivity
Connects to nearly every EHR in US Healthcare through simple point and click setup

Automate
Automate the delivery and filing of signed and completed envelopes back into your EHR

Support
Includes additional support for common electronic document management systems and intelligent file drop
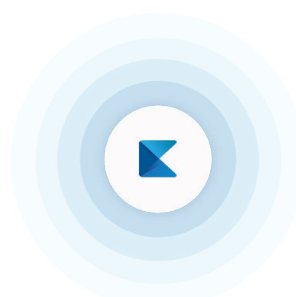

Workflow
Plugs into existing DocuSign workflows and templates/documents, no need to change how you have been working

Efficiency
Initiate the creations, distribution and field population of DocuSign envelopes awaiting signature to your patients from within your EHR

How it works

The signature workflow happens entirely within DocuSign eSignature, which is a solution that is easy to use and familiar to most patients.

Step 1

DocuSign envelope creation generated from within EHR and sent to patient

Step 2

Patient digitally completes and signs patient forms

Step 3

Signed documents are automatically filed back into the EHR

Try before you buy

→ Visit https://kno2.com/docusign-test/

→ Fill out the form and we'll send you a sample DocuSign consent directly into your EHR
