Transitions of care & referral management
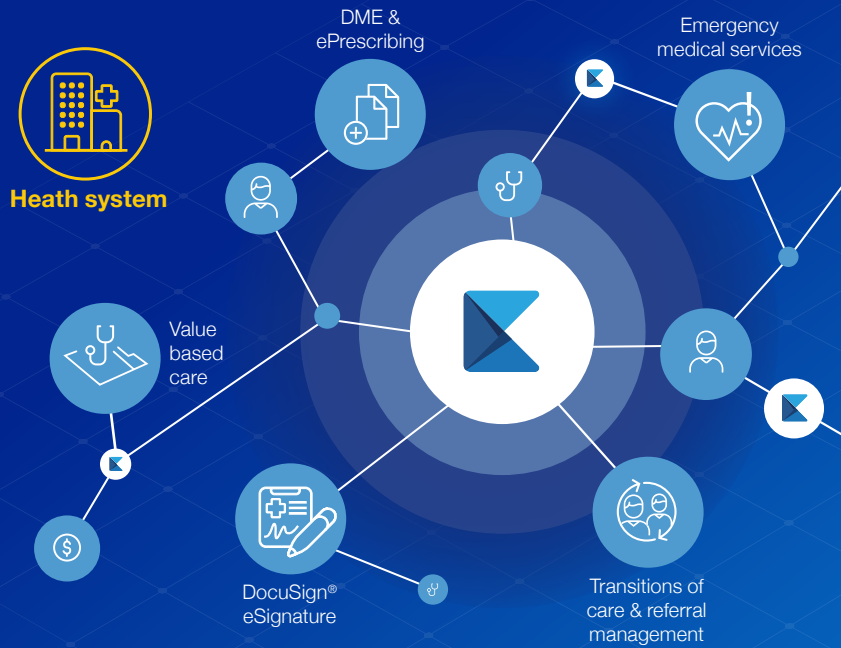

Health Systems are Surrounded by a Kno2 Connected™ Community

Maximize your technology. Minimize your spend.

Now more than ever hospitals and health systems need to maximize workflows within the technology they already own. Staff and IT teams alike need solutions that deliver real value across service lines, and drive to outcomes.

Your hospital or health system is surrounded by a Kno2 Connected community using capable systems ready to realize their true communication potential inside your everyday workflows.

Kno2's network allows for improved care coordination across the entire healthcare ecosystem. The Kno2 Connected community has what they need, you have what you need…start evolving your communication NOW.

Meaningful connectivity between the health system and the community, the effectiveness of care coordination is drastically improved, and the cost of care delivery is reduced.

Let's start the conversation.

Optimized Workflows

DME and ePrescribing

Significantly enhance and automate the collection and generation of the exact documentation needed to submit complete and accurate orders and send directly to the DME supplier in one digital package.

Transitions of care & referral management

Elevate the entire referral life cycle, from initiation through acceptance (or decline), to the conversion and rendering of care, keeping both referring and rendering provider systems informed throughout the care journey.

Emergency medical services

Your EHR has the functionality to automate the receipt of EMS run reports directly into the patient's chart and deliver patient outcomes and insurance data to EMS for QA/QI and billing without the need to acquire expensive 3rd party software.

DocuSign® eSignature

Automate the creation, distribution, and delivery of completed documents back to the patient chart in the EHR. Streamline consent capture, and eSigning workflows across the entirety of your care settings.

Value based care

Gain better visibility into your patient population. Kno2 simplifies content acquisition. Automate the query and retrieval of documentation across your entire participant network.

Payer to provider communications

Streamline communications between payers & providers by providing secure communications that keep your staff in the EHR.
